

## Durazzo Combination Colors Calculations

*(15x30 Area rectangular Pool with 3-6FT depth given as example)*

1. Divide the total square feet 855 divide by coverage of each Durazzo bag 22 Sq. Ft.
2. 38.86 Round up the total to the multiple of 10. (40)
3. Divide (40) by 10 = (4)
4. Multiply the result (4) by each color in the combination **Moonlit Lagoon** for example.

- 6 Ocean Floor x 4 = 24
- 2 Cerulean seas x 4 = 8
  - 2 Slate x 4 = 8

$$24 + 8 + 8 = (40)* \text{ Total bags required}$$

|                       |  |
|-----------------------|--|
| <b>Sea Stone</b>      | <b>8 Ocean Floor + 2 Slate</b>                   |
| Shimmering Flats      | 4 Ocean Floor + 6 French Gray                    |
| <b>Moonlit Lagoon</b> | <b>6 Ocean Floor + 2 Cerulean Seas + 2 Slate</b> |
| Cobalt Coast          | 6 Cerulean Seas + 4 Slate                        |
| Morning Mist          | 1 Slate + 4 Desert Sage + 5 Ocean Floor          |
| Icy Blue              | 6 Ocean Floor + 4 Desert Sage                    |
| Paradise Blue         | 6 Ocean Floor + 2 Cerulean Seas + 1 Slate        |

## Calculation by Bags

¿Know the Number of Bags?

*(15x30 Area rectangular Pool with 3-6FT depth given as example)*

1. If you need 38 bags Round to multiple of 10 (40)
2. Divide (40) by 10 = 4
3. Multiply by each color in Combination **Sea Stone** for example.

- 8 Ocean floor x 4 = 32
  - 2 Slate x 4 = 8

$$32 + 8 = 40* \text{ Total bags required}$$

*\*it's recommended you Add 10% more product to this total for security. (4) Bags.*
